KERUS TOURS & TRAVELLERS

Internal Strategic Blueprint — Engineering & Execution Intelligence

Document purpose: the operational master document for transforming Kerus Tours & Travellers from a phone-number-only business into a digitally enabled mobility and travel company. **Audience:** Parmenas Digital delivery team; shared selectively with Kerus management. **Owner:** Digital Transformation & Growth Partner (Parmenas Digital) **Version:** v0.9 (draft for Phase 0 validation) · **Date:** 13 August 2026 **Companion document:** 01-executive-proposal.md (client-facing). The two documents are consistent; this one is deeper and is NOT intended to be presented as-is.

Verification legend (same as the proposal): [V] verified via cited source · [O] observed · [I] inferred · [R] recommended · [TBC] to be confirmed with Kerus.

-

1. Research & Evidence Base

1.1 Audit findings (public research, August 2026)

#	Finding	Status	Evidence
1	No website found for Kerus Tours & Travellers	[O]	Searches of brand name, variations, and .ke/.com returns nothing owned by the business
2	No Google Business Profile found	[O]	Branded searches surface no Maps listing
3	No official social accounts found	[O]	TikTok/IG/FB/YT/LinkedIn searches return no business accounts
4	No public reviews found	[O]	No Google/Facebook/TripAdvisor presence under the name
5	Branded SERP owned by unrelated brands	[O]	“Keru Safaris & Tours” (Nairobi safari co.), “Kerus Global” (SA charity), “KR Travel & Tours” (Malaysia) occupy the space
6	Sales personality “Patrick”	[TBC]	Public reporting identifies Patrick Rianga (“Patrick Car Dealer”) as Nairobi’s best-known social-media car-sales personality; link to Kerus not verifiable from public sources
7	Kenya arrivals 2024: 2,394,376 (+14.7% YoY)	[V]	KNBS Economic Survey 2025 via Eastleigh Voice
8	JKIA arrivals 2024: ~1.62M (67.8% of inbound)	[V]	TRI Annual Tourism Sector Performance Report 2024
9 10	JKIA+MIA 2025 combined: 1,955,000 visitors (1,777,500 Kenya arrivals, 177,500 international) 4.6★/149 users, N’ Drive 4.3★/111, Isura 4.9★/92, Avenue	[V] [V]	KNBS data via The Star (June 2026) P citing Kenya’s Meta (LinkedIn) Appendix A)

1.2 Strategic implications

- **Name claim:** “Kerus” is short, distinctive and currently unclaimed → register `kerus.co.ke` + `kerus.com` (or nearest available) + all social handles in ONE sitting (Phase 1, day 1). Treat the near-miss brand “Keru Safaris” as a live differentiator requirement: wordmark must render as KERUS, meta titles always carry the full name.
 - **Patrick context:** the audience exists; the assets do not. Whatever the verified relationship [TBC], the strategy converts attention into owned demand. Do NOT build the plan on any single personality; build it on infrastructure that captures attention from any source.
 - **Category review counts are low** (tens to low hundreds): a disciplined review engine reaches category leadership in 6–12 months — one of the fastest compounding wins available.
-

2. Discovery Checklist (Phase 0 inputs)

Everything below is [TBC] and blocks full execution until confirmed:

Domain	Items
Legal & business	Registered business name & certificate; owner details; physical address; insurance provider & cover type (comprehensive, PSV if chauffeur); NTSA licence status; current banking/ M-Pesa Paybill or Till
Fleet	Full list: make/model/year/reg, self-drive vs chauffeur only, current rates per vehicle, photos (or photo shoot needed), maintenance schedule, GPS/tracker status
Operations	Current booking process end-to-end; who answers the phone/WhatsApp; deposit policy; cancellation policy; driver pool (if any); delivery/collection capability
Customers	Rough mix: tourists vs domestic vs corporate; top 10 repeat customers; any existing records (ledger/phone)
Marketing history	Any prior pages/accounts (even dormant); the Patrick exposure details & metrics if available; any ad spend history
Data protection	ODPC registration status (Kenya Data Protection Act 2019); consent practices

3. Brand System — Full Specification

3.1 Identity

- **Name:** KERUS TOURS & TRAVELLERS — legal/long form; **KERUS** as the masterbrand word-mark; descriptor “Tours & Travellers” in lockup.
- **Positioning statement:** *For travellers, families and organisations moving through Kenya, Kerus Tours & Travellers is the mobility partner that combines Kenyan hospitality with international rental standards — transparent pricing, documented and insured vehicles, and a booking experience built on WhatsApp and web — so every journey begins and ends with certainty.*
- **Promise:** A documented, insured, on-time vehicle — and a human who answers, every time.
- **Mission:** Make hiring a vehicle in Kenya as trustworthy and effortless as booking a flight.
- **Vision:** East Africa’s most trusted digitally enabled mobility and travel brand.

3.2 Values (bilingual working set)

Swahili	English	Behaviour
Uhakika	Certainty	Written confirmations, no surprises
Uwazi	Transparency	Prices on the page; conditions disclosed
Huduma	Service	<5 min WhatsApp response; humans who care
Usalama	Safety	Insured, documented, maintained vehicles
Ukuaji	Progress	Measured improvement every month

3.3 Voice & tone

- Clear, warm, competent. Short sentences. No hype, no “world-class!!!” energy, no fake urgency.
- Swahili greetings natural in WhatsApp/Status (“Karibu!”), English primary for web (international audience), bilingual where it adds warmth.
- Numbers and policy language are exact; marketing language is human.

3.4 Taglines (shortlist for Rhoda)

1. “**Mwendo wako. Uhakika wetu.**” (Your journey. Our certainty.) — primary recommendation
2. “Move with certainty.”
3. “Driven by trust. Powered by Kenya.”
4. “The road, on your terms.”

3.5 Visual system

Token	Spec
Primary	Deep forest green #0B3D2E (ink/trust)
Accent	Warm gold #C89B3C (Kenyan light, premium)
Neutrals	Sand #F7F4EE, stone #E8E3D8, slate #1E2A26
Typography	Display: Fraunces or Space Grotesk; Body: Inter
Imagery	Real fleet, real customers, real Kenyan roads; golden-hour editorial grade; no stock clichés
Motion	Subtle; map/route motifs; a “route line” graphic device across the brand
Logo	Wordmark KERUS + route-line mark; favicon; WhatsApp avatar; signage/magnetic decals for vehicles

3.6 Founder brand (Rhoda)

Position: **“The face of trustworthy mobility in Kenya.”** Content arcs: her story (why she started), operations standards (how vehicles are prepped), customer interactions (real, consented), education (what renters should know), industry commentary (as confidence grows). Rules: authentic, no forced personal drama; every story ends with a service truth; never fabricate customer stories — all social proof is real and consented.

4. Digital Ecosystem & Technical Architecture

4.1 Reference architecture

4.2 Technology decisions

Decision	Recommendation	Rationale	Alternatives
Website platform	WordPress (block theme, e.g. Kadence) for launch	Fastest to ship; Kenyan talent pool; best-in-class local SEO plugins; Kerus owns it fully	Headless (Next.js/Sanity) only if a dev team is retained long-term
Booking	Tier 1 (mo 1-6) : structured quote forms → WhatsApp/CRM. Tier 2 (mo 6+, when >30 quotes/mo) : availability calendar + online deposit	Avoid building a booking engine before demand justifies it; M-Pesa via Daraja STK Push	Full custom booking app (only at Tier 3, fleet >30 & corporate dashboard needs)
Domain & email	kerus.co.ke primary; defensive .com; Google Workspace (hello@, bookings@, admin@)	Local trust signal + brand protection	—
Hosting	Managed WP hosting with CDN (Cloudflare in front); target LCP < 2.5s on 3G Nairobi	Speed = rankings + conversion	—
CRM	HubSpot free tier → paid as volume grows (or Zoho CRM)	Lead source tracking, pipelines, email+WhatsApp logging	—
WhatsApp	Stage 1 : WhatsApp Business App (day 1). Stage 2 : WhatsApp Business API via BSP (Twilio/360dialog) when >50 conversations/day or 2+ agents	API enables automation, templates, shared inbox	—
Analytics	GA4 + Search Console + Looker Studio + Meta & TikTok pixels + WhatsApp click events	One dashboard, six money questions	—
Payments	Vanessa's tracking link for Twilio/Daraja STK push first step in the funnel Cards via Stripe M-Pesa via PesaLink (if approved) USSD via Kerus (if available)	Cost efficiency; gradual rollout function	Cards via payment gateway (only if diaspora/international share grows)

4.3 Account ownership rule

Every account is registered under Kerus's business email, paid from Kerus's M-Pesa/card, and documented in a shared credential vault (Bitwarden/1Password business). Parmenas Digital operates with delegated admin access — never as the owner of record. This is a hard rule, written into the governance model (§14).

5. Website Information Architecture & Page Specs

5.1 Sitemap

/	Homepage
/fleet/	Fleet index (filter by class/purpose)
/fleet/{vehicle}/	Vehicle detail (× fleet size)
/self-drive/	Self-drive hub (requirements, process)
/chauffeur/	Chauffeur services
/airport-transfers/	JKIA & Wilson transfers (fixed price table)
/tours/	Tours & travel hub
/corporate/	Corporate & NGO hire
/long-term/	Monthly rentals
/events/	Weddings & events
/about/	About + founder story
/why-kerus/	Differentiators + proof
/reviews/	Review wall + links
/faq/	FAQ hub (schema'd)
/contact/	NAP, map, hours, channels
/quote/	Multi-step quote form
/book/	Deposit & confirmation
/blog/	Travel intelligence
/blog/{slug}/	Articles
/legal/...	Terms, privacy, booking & cancellation policy

5.2 Page specification table (objective / target / intent / CTA / goal) — as in the Executive Proposal §7, extended with schema & SEO notes:

Page	Schema	SEO notes
Homepage	AutoRental + Organization	Title: “Car Hire Nairobi
Fleet	ItemList	Category subheads target “4x4 hire nairobi”, “suv hire kenya”, “van hire nairobi”
Vehicle detail	Product + Vehicle (make-Model, offers.priceSpecification, vehicleTransmission, fuelType)	Unique title/meta per vehicle: “{Model} Hire Nairobi — KES {rate}/day
Self-drive	FAQPage (requirements)	Cluster head for “self drive car hire Kenya” + requirement keywords
Airport transfers	FAQPage + price table	“airport transfer nairobi price”, “jkia to {area}” pages later
Tours	TouristTrip/ItemList per tour	“day trips from nairobi”, “safari from nairobi”
Reviews	Review aggregate (real reviews only — Google policy compliance)	Pulls real Google reviews via API/copy with consent
FAQ	FAQPage	The objection-removal page; interlinks every vehicle/rental term
Blog	Article	Pillar → cluster structure (§6)

5.3 Non-functional requirements

- Mobile-first (≥85% of traffic will be mobile); LCP < 2.5s, CLS < 0.1 on 3G.
- Accessibility: contrast AA, alt text, keyboard navigation.
- Every CTA: UTM-tagged + event-tracked; WhatsApp links use wa.me with pre-filled text per vehicle/page (“Hi Kerus, I’m interested in the Toyota Prado (ref: PRADO-TX)...”).
- Pricing block on every vehicle page: daily/weekly/monthly rate, deposit, mileage policy, insurance note, “check availability” CTA. **No hidden pricing** — the category’s #1 trust gap.
- Multilingual: English at launch; Swahili version as Phase 4+ option if analytics justify.

6. SEO Architecture

6.1 Keyword cluster map (directional; refined in Phase 0 with keyword tools)

Cluster	Head terms	Long-tail	Target page
Branded	kerus tours & travellers; kerus car hire	kerus tours & travellers nairobi	Home/About
Local self-drive	self drive car hire nairobi; car hire nairobi	affordable self drive nairobi; car hire nairobi cbd; car hire near me jkia	Home, /self-drive/, GBP
Vehicle/commercial	toyota prado hire nairobi; rav4 hire kenya; van hire nairobi	prado hire nairobi price; land cruiser hire kenya price	Vehicle pages
Transfers	airport transfer nairobi; jkia transfers	jkia to westlands transfer; wilson airport pickup	/airport-transfers/
Chauffeur	chauffeur nairobi; driver hire nairobi	chauffeur driven car hire nairobi price	/chauffeur/
Corporate/B2B	corporate car hire kenya; long term car rental nairobi	ngo car hire nairobi; monthly car rental kenya	/corporate/, /long-term/
Events	wedding car hire nairobi	wedding car hire nairobi prices; event transport nairobi	/events/
Informational	car hire requirements in kenya; self drive kenya rules	how much is car hire in nairobi; deposit for car hire kenya	/faq/, blog
Destination/travel	day trips from nairobi; lake naivasha day trip	nairobi to maasai mara road trip; hells gate self drive	Blog + /tours/

6.2 Execution pillars (no ranking promises — only the mechanisms that produce them)

1. **Technical:** clean IA, schema everywhere, Core Web Vitals, sitemap + GSC from day 1, hreflang later if bilingual.
2. **Content:** pillar posts (“The Complete Guide to Self-Drive Car Hire in Kenya”) + cluster articles, 2/month minimum, refreshed quarterly.
3. **Internal linking:** every vehicle page ↔ FAQ ↔ relevant guide; blog → commercial pages (money flow).

4. **Local:** GBP optimisation (categories, attributes, Q&A, weekly posts, photo naming), 30+ citations (BusinessList.co.ke, Yello, Cylex, TripAdvisor, Safaribookings, hotel/airport directories), NAP consistency audit.
5. **Reviews:** velocity system (§8.6) — the strongest local ranking signal in this category.
6. **Digital PR:** 1–2 placements/month — diaspora media (e.g. travel blogs, Facebook diaspora groups), tourism blogs, local business media; founder interviews.
7. **Measurement:** GSC impressions/clicks per cluster; Looker Studio trend; monthly rank tracking on 25 money keywords (directional).

7. Content System & Production Workflow

7.1 Pillars × formats matrix

Pillar	TikTok/Reels (3/wk)	YouTube (1/wk)	Blog (2/mo)	WhatsApp Status (daily)
Fleet	Walkarounds, before/after prep	Full reviews	Vehicle comparison guides	Availability drops
Education	“3 things to check before self-drive”	“How car hire works in Kenya”	Pillar guides	Daily tip
Travel	Route reels	Road-trip vlogs	Destination guides	Trip moments
Trust	Customer interviews (consented)	Testimonials compilations	Customer stories	Review reposts
Behind the scenes	Vehicle prep, handovers	Operations day	Fleet care standards	Live ops
Founder	Rhoda’s story beats	Founder series	Founder essays	Personal notes
Offers	Promo cuts	—	Campaign pages	Flash offers

7.2 The repurposing system (1 shoot → 10+ assets)

- 1 monthly production day (fleet + Rhoda + operations)
- 1 YouTube long-form (8–15 min)
 - 3–5 vertical cuts (TikTok/Reels/Shorts)
 - 1 blog guide (embed video)
 - 5–7 WhatsApp Status clips
 - 2–3 GBP posts
 - email/status broadcast (list, with consent)

7.3 Production roles & cadence

- **Rhoda / ops team:** phones, daily – raw moments, status updates, customer service clips.
- **Content lead (retainer):** edits, captions, calendar, posting, repurposing.
- **Monthly pro shoot:** fleet beauty shots + founder portraits (bank of 12 months of assets).
- **Calendar:** monthly content plan approved in the weekly meeting; bank 2 weeks of content ahead at all times.

7.4 Channel playbooks (summary)

- **TikTok:** 3×/week, native style (not ads), trending sounds where tasteful, hook in first 1.5s, every video ends with a soft CTA (“Link in bio → instant WhatsApp quote”).
- **Instagram:** Reels + carousel fleet features + Story highlights (Fleet, Requirements, Reviews, FAQ).
- **Facebook:** community/diaspora groups, marketplace-style posts, event/wedding content, reviews.
- **YouTube:** the trust vault – long-form reviews/guides; comments replied daily.
- **WhatsApp Status:** daily – this is the retention channel (existing contacts see it free).

8. WhatsApp Commerce Architecture

8.1 Stages

Stage	Tool	Trigger	Capability
1 (Day 1)	WhatsApp Business App	—	Catalogue (fleet), auto-greeting, quick replies, labels (source, vehicle, status)
2 (Month 2–3)	App + structured playbook	—	Qualification scripts, quote templates, deposit flow, SLA enforcement
3 (Month 4–6)	WhatsApp Business API via BSP	>50 conversations/day or 2+ agents	Shared inbox, automation, template messages, CRM integration

8.2 Conversation architecture (spec)

GATE 0 – GREETING (instant, always)

"Karibu Kerus Tours & Travellers ☐☐

How can we help today?

☐☐☐ Self-drive ☐☐☐ Chauffeur ☐☐☐ Airport transfer
☐☐☐ Tours ☐☐☐ Corporate ☐☐☐ Talk to a person"

GATE 1 – QUALIFY (quick-reply tree)

Self-drive → dates → vehicle class → licence/age → pickup location → passengers

Chauffeur → dates → route/occasion → passengers → vehicle preference

Transfer → flight no. → date/time → destination area → passengers

Tours → interest → dates → group size → budget band

Corporate → org → need → duration → volume → decision maker

GATE 2 – QUOTE (human + template, < 30 min business hrs)

Structured quote block: vehicle · dates · rate × days · deposit · balance · included (insurance, mileage) · next step

GATE 3 – BOOK (human)

Written confirmation → deposit (M-Pesa) → receipt → booking ref → T&Cs link

GATE 4 – PRE-TRIP (automated, Stage 3)

T-2 days reminder (pickup point, docs to carry, payment balance)

GATE 5 – HANDOVER

Photo check-in (exterior/interior, odometer, fuel) via WhatsApp → stored to booking record

GATE 6 – RETURN → REVIEW (automated, Stage 3)

Inspection → thank-you → Google review link (deep link) → referral ask

8.3 SLAs (internal standard)

Metric	Standard
First response (auto)	< 5 seconds
First human response (business hrs 7:00–21:00)	< 5 minutes
Quote delivered after qualification	< 30 minutes
Follow-up if no reply after quote	24h, then 72h (gentle, once)
Every conversation tagged & logged to CRM	100%

8.4 Compliance & hygiene

- Personal data handled per Kenya DPA 2019 (ODPC registration required – §12).
- Marketing broadcasts only to opted-in lists; templates approved via API rules; no scraping/unsolicited bulk messaging (platform-ban risk).
- Sensitive documents (ID, licence) requested only after booking intent, stored in CRM with restricted access, deleted per policy.

9. CRM Data Model

9.1 Entities

Lead → source, channel, campaign, entry date, first response time, status **Contact** → name, phone, email, country, segment (tourist/domestic/corporate/diaspora), consent flags, source of first contact **Vehicle** → reg, make/model, class, daily/weekly/monthly rate, status (available/booked/maintenance), insurance, tracker **Booking** → ref, contact, vehicle, start/end, pickup/dropoff, rate, deposit, balance, terms version, status **Payment** → ref, booking, amount, method (M-Pesa code), date, receipt issued **Review** → contact, booking, platform, rating, text, published date, reply status **Referral/Partnership** → partner, code/link, bookings attributed, commission status

9.2 Pipeline

New Lead → Qualified → Quoted → Negotiation → Won(Booked) → In-Trip → Returned → Reviewed → (Repeat / Dormant)
Dormant → Re-engaged (nurture)

9.3 Data rules

- One contact per phone number (dedupe on +254 normalised number).
 - Every touch logs: source, timestamp, outcome — “where did this customer come from?” must always be answerable.
 - Monthly export to Kerus-owned storage (Google Drive under business account) — data portability guarantee.
-

10. Automation Workflows

#	Workflow	Trigger	Actions	Tooling
1	Website enquiry → CRM	Quote form submit	Create lead, tag source, auto-reply WhatsApp/SMS, notify ops	Site → CRM (native/Zapier)
2	WhatsApp enquiry → CRM	New conversation (Stage 3)	Create lead, tag source/label	BSP webhook → CRM
3	Booking → confirmation	Deposit received (M-Pesa callback)	Send confirmation + receipt + ref	Daraja callback → template
4	Payment → receipt	M-Pesa STK success	Receipt PDF/template, log payment	Daraja
5	Upcoming booking → reminder	T-2 days	WhatsApp/email reminder + docs checklist	CRM workflow
6	Return → review request	Trip end	Google review link + soft ask	CRM workflow
7	Inactive → re-engagement	90/180 days no activity	Gentle WhatsApp offer (“we saved your number”)	CRM workflow
8	Repeat → loyalty offer	2nd booking	Thank-you + loyalty discount	CRM workflow
9	Review → reputation DB	New review anywhere	Log, notify, flag <4★ for owner reply	Review monitoring
10	Content → publishing	Calendar item due	Draft → approve → publish → repurpose checklist	Content calendar

Design principle: automation removes friction, never the human. Every automated message is signed by a person (Rhoda/team) and every escalation path ends at a human.

11. Analytics & KPI Framework

11.1 Event taxonomy (GA4)

view_vehicle · start_quote · quote_submitted · wa_click · call_click · booking_confirmed · deposit_paid · review_link_clicked · blog_read · gmap_directions

11.2 KPI definitions

KPI	Definition	Formula
Lead volume	Qualified enquiries logged	count
Cost per lead	(ad spend + content cost) / leads	per channel
Enquiry → booking	Booked / qualified leads	≥25% target (12 mo)
Cost per booking	Spend / bookings	per channel
Repeat rate	Repeat bookings / total	≥20% target (12 mo)
Review velocity	New Google reviews / month	5+ / mo steady state
Response time	First human WhatsApp reply	<5 min (business hrs)
Organic visibility	GSC impressions & clicks trend	monthly, per cluster
Vehicle revenue	Revenue per vehicle	monthly
Channel revenue	Bookings revenue by source	monthly

11.3 Dashboard spec (Looker Studio v1 in 90 days)

Page 1 — **Acquisition:** leads & bookings by channel, CPL, CPB, trends. Page 2 — **Conversion:** funnel (visit → quote → booking), response times, quote win rate. Page 3 — **Assets:** organic impressions/clicks, rankings (25 money keywords), reviews & rating trend, followers. Page 4 — **Money:** revenue by channel & vehicle, repeat rate, LTV proxy (avg booking value × repeat factor).

Refreshed automatically; reviewed in the monthly governance meeting (§14).

12. Trust, Legal & Compliance

Area	Action
Data protection	Register with ODPC under the Kenya Data Protection Act 2019 (mandatory for businesses processing personal data); publish Privacy Policy; consent checkboxes; data minimisation
Terms & policies	Terms & Conditions, Booking Policy, Cancellation Policy, Rental Requirements, Payment Policy – drafted by counsel, hosted at /legal/, linked in every booking & quote
Payments	M-Pesa Paybill with business name (trust signal); receipts for every payment; refund policy explicit
Identity & fraud	Verification at booking (ID/licence), deposit protects the business, written records protect the customer; never request ID via public channels – only via verified business number
Vehicle records	Digital check-in/out photos (odometer, fuel, condition) stored with the booking – the single most effective dispute-prevention tool in the industry
Insurance disclosure	What is covered/excess/what is not – stated on the site and in every quote. (Insurance provider & terms: [TBC] from Kerus)
Reviews integrity	Only real customers are invited; no incentivised reviews (Google policy); respond to 100% of reviews, especially negative ones
Platform risk	One backup channel for every primary (email + call beside WhatsApp; social beside Google) – no single-platform dependency

13. Implementation Dependencies & Client Inputs

Dependency	Needed by	Owner
Discovery answers (\$2)	Phase 0 end	Rhoda
Fleet photos + specs + rates	Phase 2	Kerus
Pricing approval (per vehicle)	Phase 2	Rhoda
Brand direction approval	Phase 2	Rhoda
M-Pesa Paybill/Till + Daraja credentials	Phase 5	Kerus
ODPC registration	Phase 1 (parallel)	Kerus (we prepare)
T&Cs legal review	Phase 2	Counsel (Kerus-engaged)
Domain purchase decision	Phase 1 day 1	Rhoda
Ad budget approval	Phase 4/7	Rhoda
Content availability (1–2 hrs/ wk of Rhoda + ops)	Phase 4 onward	Kerus

14. Governance & Operating Model

14.1 Roles

Role	Responsibility
Rhoda (owner)	Decisions, brand voice, pricing, customer relationships
Ops/fleet manager (Kerus)	Handovers, vehicle records, WhatsApp coverage
Content lead	Content engine execution
Digital Transformation & Growth Partner	Strategy, architecture, SEO, analytics, automation, optimisation, technical governance

14.2 Cadence

- **Weekly (30 min):** numbers check — leads, bookings, response time, content published, issues.
- **Monthly (90 min):** dashboard review, channel decisions, budget reallocation, content plan approval.
- **Quarterly (half day):** strategy review — moat health, pricing vs market, roadmap re-plan, expansion gates.

14.3 Ownership & exit (anti-lock-in, written into the contract)

- Kerus owns: domain, hosting, all accounts, all content, all data, all credentials (vaulted under business email).
 - Open standards only: WordPress, standard plugins, exportable CRM, documented workflows.
 - Exit: 30-day handover with full documentation; nothing is held. We win by performance, not possession.
-

15. Risk Register

#	Risk	L	I	Mitigation
1	Legal exposure: no ODPC registration / unclear T&Cs	H	M	Register Phase 1; counsel-drafted policies before booking goes live
2	Brand squatting (“Kerus” domains/handles)	H	M	Register all in Phase 1 day 1; monitor quarterly
3	Reputational risk from unverified “Patrick” association	M	M	Verify facts in Phase 0; all public claims factual & consented; build brand on owned assets
4	WhatsApp/Google platform policy changes or suspension	M	M	Keep email+call backups; compliance hygiene; never bulk-spam
5	Google Business Profile suspension (category/verification)	M	L	Accurate NAP, real address, genuine photos, policy compliance
6	Pricing opacity claims / negative reviews	M	M	Transparent pricing on site; review response protocol; service recovery
7	Seasonal demand swings (tourism peaks)	M	H	Corporate & diaspora segments balance seasonality; retargeting off-season
8	Fleet capacity vs demand mismatch	M	M	Lead tracking prevents over-promising; availability calendar (Tier 2)
9	Partnership with deposit agencies in market	M	M	Single on-portal transactions, delegate marketing ops, show fleet assumptions (14.3)

(L = likelihood, I = impact; H/M/L)

16. Expansion Opportunities & Gating Criteria

Stream	Effort	Margin signal	Gate to open
Self-drive (core)	—	High volume, moderate margin	Now
Chauffeur services	Med	High margin	Now (if driver pool exists [TBC])
Airport transfers	Low	High margin	Now
Corporate accounts	Med	High LTV	10+ fleet & invoicing ready
Long-term rentals	Med	Steady cash flow	Utilisation < 70% on part of fleet
Tours & travel packages	Med	High margin	3+ proven routes + licensed guides
Wedding/event transport	Low	High margin	Decoration partners identified
NGO/institutional	Med	High LTV	Compliance docs ready
Diaspora segment	Low	High LTV	Payment rails for diaspora (cards/MPESA global)
Fleet partnerships (driver-owned cars)	High	Asset-light growth	Brand & insurance standards defined
Marketplace listings (aggregators)	Low	Volume	Own brand strong enough to survive margin pressure
Customer portal / app / telematics	High	Efficiency & retention	>30 vehicles OR >150 bookings/mo

Rule: every expansion is gated on measured data (utilisation, CAC, repeat rate), never on enthusiasm.

17. Partnership Playbook

17.1 Targets & mechanics

Partner type	Examples	Mechanic
Hotels & Airbnb hosts	Westlands/Karen/CBD hotels, Mombasa resorts	Referral code + co-branded landing page; 5–10% commission benchmark
Tour operators/agencies	Safari ops, travel agencies	White-label vehicle supply; reciprocal referrals
Corporates & NGOs	Organisations with field ops	Corporate account terms, monthly invoicing
Event planners	Wedding planners, event firms	Package rates + priority fleet
Universities & diaspora networks	Student bodies, diaspora FB groups	Group rates, ambassador programme
Content creators	Travel creators	Vehicle seeding for content (documented, disclosed)

17.2 System

Unique wa.me link + landing page per partner → partner-tagged leads in CRM → monthly attribution report → commissions paid on confirmed bookings. **No partnership is announced publicly until verified and consented** (no fabricated logos or affiliations).

18. Implementation Roadmap – Phase Detail

Phase	Deliverables	Dependencies	Timeline	KPIs	Client input	Tech	Business outcome
0 Intelligence & Strategy	Confirmed audit, brand direction, keyword map, firm quotation	Discovery answers	Wk 1–2	Signed-off strategy	\$2 answers	—	Alignment; zero assumptions
1 Digital Foundation	Domain+email live, GBP claimed/verified, WhatsApp Business configured, GA4+GSC+pixels, CRM, credential vault	Phase 0	Wk 2–4	All assets live & verified	Domain decision, ODPC start	\$4.2	Business is findable & trackable from day 1
2 Brand & Website	Brand system applied; booking-engine website; legal pages; photo shoot	Phase 1 + content inputs	Wk 4–10	Site live, indexed, LCP<2.5s	Fleet data, pricing, brand approval	WP + schema + wa.me	Trust headquarters live
3 Search & Local Visibility	GBP optimised, 30+ citations, review engine, digital PR	Phase 2	Mo 2–5	GBP views/actions, first 10 reviews	Review replies	GMB + citations	Discovery begins
4 Scale & Ship Outfits & Campaigns	Marketing pipeline, fully GAC, platform partnerships, content	Phase 3–4	Wk 6–12	CRM, GBP, flowcharts, 29+ phone calls, lead w/ing	Anyhold-out, at time	ASPR+GMB, BSR, 100+ pages	CS, 100+ leads, 100+ calls

19. 90-Day Execution Plan (Week by Week)

Week	Execution
1	Phase 0: discovery call, audit finalisation, brand direction, keyword map
2	Phase 0 sign-off; register domains + all social handles; ODPC process started
3	Email + GBP claim + WhatsApp Business config + GA4/GSC/pixels + CRM setup
4	Brand system applied (logo, palette, voice); photo shoot 1 (fleet + Rhoda)
5–6	Website build: IA, design system, homepage/ fleet/vehicle templates
7–8	Website build: services, quote flow, FAQ, legal pages; content v1 written
9	Launch checklist: schema, speed, analytics events, wa.me CTAs; site live
10	GBP optimisation + first citations + review invite flow; content engine batch 1
11–12	First dashboard + first monthly review; ads test budget (small, measured); social cadence stabilised
13	90-day review: scorecard vs \$21 targets, pricing refresh, next-quarter plan

30-day immediate actions (first month): own the name everywhere; verify GBP; WhatsApp Business live with catalogue + greeting; analytics installed; brand approved; website in build.

20. 12-Month & 3–5 Year Technical Evolution

Month 12 state: WordPress site at scale (30+ pages), API WhatsApp with automation, CRM with clean data, dashboard mature, review portfolio 25–50 @ 4.7★+, ads scaled on CAC, 5+ active partners, corporate pipeline open.

Year 2–3: availability calendar + online deposit; PWA (installable, offline rates); customer portal (bookings/documents); loyalty programme; telematics on fleet; Swahili site version if data supports; content library 100+ videos.

Year 4–5: native app only if PWA/portal retention justifies; corporate dashboard; partner portal; multi-city (Mombasa, Kisumu) and East Africa via partnerships; marketplace integrations; data-led pricing engine. Each gate in §16.

22. Appendix B — Phase 0 Discovery Questions for Rhoda

1. What is the registered business name & legal structure? Registration number?
2. Current fleet: make/model/year/reg per vehicle; which are self-drive vs chauffeur-only?
3. Current rates per vehicle (daily/weekly/monthly) and deposit policy?
4. Insurance: provider, cover type, excess, self-drive eligibility rules?
5. Who currently handles enquiries? What are the current booking, payment and cancellation steps?
6. Do you have a physical office/address? Pickup/delivery capability?

7. The Patrick exposure: what exactly happened, which platform, what reach, is there any ongoing relationship or permission to use the content?
8. Rough customer mix: tourists / domestic / corporate / diaspora — percentages?
9. Any existing (even dormant) pages, accounts, or listings under any name?
10. Goals in Rhoda's words: what does success look like in 12 months? (revenue, fleet size, brand, lifestyle)
11. Budget envelope for digital investment (setup + monthly)?
12. Who else is on the team (drivers, office staff, partners) and their WhatsApp/phone coverage hours?
